

# Apartment Building FRQ

	0	1
class signature		x
fields created		X fields not used (and not necessary) for adressApartment
constructor signature with correct parameters		x
call to super constructor		x
set size of array correctly	X aptWattHours data type is already set in the fields and should not be redefined in the constructor (this creates a new temporary variable instead of setting the field aptWattHours)	
amtOwned method signature correct		x
loop through apartment array	x	
amtOwned method calculates sum	x	
amtOwned multiplies sum by rate correctly and amount returned	x	

Total: 5/9
